

CURRICULUM VITAE

Priyanshu Rai

Computer Science Student

✉ : priyanshurai1920@gmail.com

☎ +91- 9555418346

📍 : C-31 GTB Nagar, Kareli, Prayagraj, Uttar Pradesh

🌐 : <https://www.linkedin.com/in/priyanshu-rai-382971247/>

A highly driven and enthusiastic fresher with a strong academic background and a keen interest in contributing to organizational growth. Possesses excellent communication skills, a positive attitude and the ability to adapt quickly to new environments. Eager to apply the theoretical knowledge to the real world challenges and to continuously learn on the job.

TECHNICAL SKILLS

- **Databases:** MySQL, SQLite, PostgreSQL, Firebase, MongoDB Database Design, SQL Queries, Query Optimization, Stored Procedures, Indexing, Backup & Recovery
- **Programming & OOP Concepts:** C++, Python (OOPs, Data Structures & Algorithms, System Design Principles), Java (Basic), C language, Javascript
- **Web Technologies:** HTML, CSS, Javascript, React Js., Tailwind, NodeJs, Flask, REST APIs
- **Data Science and Analytics:** Power BI, Tableau, MS Excel, Pandas, Scikit-learn, Matplotlib, Numpy.
- **Machine Learning:** Python, Scikit, PyTorch, Numpy, Pandas, Keras, FastAPI
- **Cloud Computing:** Amazon Web Services (AWS), Hadoop*
- **Tools & Technologies:** Git/GitHub, VS Code, Postman, MS Office, ArcGIS, Docker (basic), Jupiter, Turbo C/C++ , Google Cloud Console, Netlify, Notion, Vercel, Google Workplace, Virtualization (VMware, VirtualBox)
- **Other Technical Areas:** Debugging, Unit testing, Version control, Automation, Analytics, GIS Mapping

NON- TECHNICAL SKILLS

- **Communication**
- **Team Management**
- **Problem Solving**
- **Flexible**
- **Situation Awareness**
- **Personal Management**
- **Active Listening**
- **Empathy**

EDUCATION

COURSE	COLLEGE/SCHOOL NAME	PERCENTAGE	YEAR
Bachelors of Technology (CSE)	Shambhunath Institute of Engineering and Technology	8.01 CGPA	Passed in 2026
Higher Secondary	Ewing Christian Public School	75%	Passed in 2022
Secondary School	Ewing Christian Public School	78%	Passed in 2020

EXPERIENCE

Research Intern – IIT Mandi (CAIR Department) (May 2025 – August 2025)

- Conducted research on AI-based image translation (Day-to-Night conversion using diffusion models).
- Implemented deep learning models in Python (PyTorch) and performed dataset preprocessing, training, and evaluation.
- Collaborated with faculty and researchers to optimize model performance and improve accuracy.
- Gained hands-on experience in computer vision, machine learning, and advanced research methodologies.

President – SIET Coding Club (June 2024 – June 2026.)

- Leading the official coding and innovation club of the institute with 500+ active members.
- Organized hackathons, coding competitions, and workshops on AI, Web Development, and Competitive Programming.
- Spearheaded the creation of SIET Virtual Vault (online portal for resources & question papers).
- Mentored juniors in problem-solving, project building, and career guidance, boosting club participation and performance.

Student Fellow – Be10x Academy (December 2022 – April 2026 and continuing..)

- Selected as a student fellow for promoting AI & automation tools in education and productivity.
- Learned and explored various technologies and software tools, enhancing technical adaptability.
- Achieved multiple certifications in areas like AI tools, automation, and productivity enhancement.
- Delivered awareness sessions on No-Code tools, ChatGPT, and AI-driven solutions to peers.
- Strengthened leadership, communication, and training skills while contributing to a community of learners.

IT Generalist – Sugandha Foundation (April 2023 – April 2026 and continuing..)

- Supported website updates, digital platforms, and online communication tools used by the organization.
- Coordinated with different departments to identify technology requirements and implement effective solutions.
- Monitored system performance and ensured timely resolution of technical problems.
- Maintained documentation of IT assets, software licenses, and technical procedures.
- Assisted in data management, report generation, and process automation to improve operational efficiency.

Volunteer – Google Developer Groups (GDG) Prayagraj August 2024 – January 2026

- Assisted in hosting developer meetups and technical sessions on cutting-edge technologies (AI, Cloud, Web, Mobile).
- Supported community members in learning Google technologies and participated in open-source initiatives.
- Enhanced networking and collaboration skills while working with tech professionals and enthusiasts.

Business Analytics Dashboard with ML Insights

Technologies: Python(Flask), React.js, Chart.js / Recharts, MySQL, Pandas, NumPy, Scikit-learn, Power BI / Tableau, REST APIs, Git, GitHub

Developed a full-stack Business Analytics Dashboard to monitor sales performance, analyze customer behavior, and generate data-driven insights. Implemented interactive visualizations for revenue trends, product performance, and inventory tracking. Integrated machine learning (K-means clustering) to segment customers based on purchasing patterns, enabling targeted business decisions. Enhanced reporting efficiency by automating data aggregation and visualization.

Key Features:

- Real-time sales dashboard with interactive charts
- Customer segmentation using K-means clustering
- Inventory tracking with low-stock alerts
- Trend analysis for business insights
- Data export (CSV/PDF)

Automated Invoice Processing System

Technologies: Python (Flask), HTML, CSS, MySQL, Pandas, PyPDF2 / pdfplumber, pytesseract, REST APIs, Git, GitHub

Built an automated invoice processing system to streamline financial data extraction and reporting. Designed a pipeline to upload invoices (PDF/images), extract key information (invoice number, vendor, date, amount), and store structured data in a database. Developed reporting features to analyze expenses and vendor-wise spending, reducing manual effort and improving operational efficiency.

Key Features:

- Invoice upload and processing (PDF/image)
- Automated data extraction using parsing techniques
- Structured storage in SQL database
- Expense dashboard and reporting
- Email-based report automation

Book Recommender System

Technologies: Python, NLP, Numpy, Pandas, Pillow

Built a Book Recommender System using Python and Natural Language Processing (NLP) techniques to provide personalized book suggestions based on user preferences and textual data. Implemented text preprocessing methods such as tokenization, stop-word removal, and vectorization to analyze book descriptions and user inputs. Applied similarity measures and recommendation algorithms to generate accurate and relevant recommendations. Focused on improving recommendation quality, optimizing performance, and enhancing user experience through data-driven insights.

ArogyaPath – AI Telemedicine System

Technologies: Python, ReactJs, TailwindCSS, NodeJs, , MySQL, FastAPI, Google APIs, Hugging Face Transformers, NLP, K-Means Clustering, Numpy, Pandas, OpenAI, Scikit-learn, Torch, Pillow

Developing an AI-powered healthcare assistance platform designed to provide intelligent health guidance and information support. Building scalable backend services using NodeJs, with MySQL for efficient data management and storage. Integrating Google APIs in future for enhanced functionality and leveraging Hugging Face Transformers with NLP techniques to process and analyze medical queries in natural language. Focused on implementing secure data handling, model optimization, and user-centric design to deliver accurate, real-time AI-driven responses.

Diffusion-Based Day-to-Night Translation Model (Ongoing)

Technologies: Python, PyTorch, Hugging Face Transformers

Developing a diffusion-based image translation model to convert daytime images into realistic nighttime scenes. Implementing and fine-tuning deep learning architectures using PyTorch and leveraging pre-trained models from Hugging Face Transformers to enhance image generation quality. Working on dataset preprocessing, model training, and optimization to improve visual consistency, lighting transformation, and detail preservation. Focused on experimenting with diffusion techniques, loss functions, and performance tuning to achieve high-quality image-to-image translation results.

Inventory Management and Billing System

Technologies: Python, Flask, MySQL

Developed a web-based Inventory Management and Billing System to streamline stock tracking, product management, and invoice generation. Designed and implemented RESTful APIs using Flask and managed relational databases with MySQL to ensure efficient data storage and retrieval. Integrated features such as real-time inventory updates, automated billing, customer record management, and sales reporting. Focused on building a user-friendly interface, optimizing database queries, and ensuring data accuracy and security.

Uber Clone (Ride-Sharing Web Application)

Technologies: MERN Stack (MongoDB, Express.js, React.js, Node.js)

Developed a full-stack ride-sharing web application inspired by Uber using the MERN stack. Implemented user authentication, ride booking, real-time location handling, fare estimation, and trip management features. Designed RESTful APIs with Node.js and Express.js, managed data using MongoDB, and built a responsive, dynamic frontend with React.js. Focused on scalable architecture, secure authentication, and seamless user experience across both rider and driver modules.

Spotify Clone (Frontend Only)

Technologies: HTML5, CSS3, JavaScript, CSS Modules

Developed a responsive music streaming web interface inspired by Spotify, focusing on seamless UI/UX design, dynamic component rendering, and interactive media controls. Implemented modular components and optimized layout for performance and scalability.

Flipkart Clone (Frontend only)

Technologies: HTML5, CSS3, JavaScript, CSS Modules

Built a fully responsive e-commerce frontend inspired by Flipkart with product listings, filtering, and cart functionality. Designed reusable components and implemented dynamic UI rendering to simulate real-world shopping workflows.

SMS Spam Classifier

Technologies: Python, Scikit-learn, Pandas, NumPy, Flask, NLP (TF-IDF),Tokenization, Stopword Removal, Stemming, Logistic Regression

Developed an end-to-end SMS Spam Classification system using Natural Language Processing (NLP) and machine learning techniques to automatically detect spam messages. Performed data cleaning, text preprocessing (tokenization, stopword removal, stemming), and feature extraction using TF-IDF vectorization. Trained and evaluated multiple classification models such as Naive Bayes and Logistic Regression, achieving high accuracy (~95%). Designed the system to handle real-time message input and classify it efficiently, with optional deployment using a lightweight web interface.

Win Probability Predictor

Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Streamlit for UI

Developed a machine learning-based win probability prediction system to estimate the likelihood of a team winning during a match based on real-time game conditions. Performed data preprocessing, feature engineering, and exploratory data analysis on historical match datasets to identify key factors such as score, overs, wickets, and run rate. Trained classification/regression models (e.g., Logistic Regression, Random Forest) to generate dynamic win probabilities. Evaluated model performance using accuracy and classification metrics, and built an interactive interface for real-time prediction visualization.

ACHIEVEMENTS

- Winner in **Debate Competetion** in School (2022)
- Facilitated as Campus Ambassador for **MNNIT Allahabad E-Cell** (2023)
- Winner in **India Today Anchoring Competition**. (2023)
- 2nd Runner Up in **HackVerse Coding Hackathon** (2023)
- Winner of **Coding Cauldron Live Web Hackathon** (2023)
- 2nd Position in **Badminton(Singles)** in **AKTU Zonal Sports**. (2023)
- Facilitated as Campus Ambassador in **Virtual Labs Cell, Kanpur**. (2024)
- Winner of Website Development Challenge in **Let's Upgrade Community**. (2024)
- 1st Runner Up of **Poster Making Competetion**. (2024)
- Winner of **Poster Making Competetion**. (2025)
- Winner of **Code Odyssey Website Hackathon**. (2025)
- Winner of **Audacity (A debate competition)**. (2025)
- Recognized as **Best Intern at Virtual Labs IIT Kanpur**. (2026)

CERTIFICATIONS

- Coding Nomads – Best for Intermediate Analysts
- Employability Enhancement Programme - Infosys Foundation & Centum Foundation
- MySQL Masterclass with AI - Be10x Academy
- Python for All - Be10x Academy
- Digital Marketing Mastery- Be10x Academy
- Generative AI- Be10x Academy
- Tableau Masterclass- Be10x Academy
- Data Analytics Using AI- Be10x Academy
- Data Analytics Job Simulation- Deloitte (Forage)
- AI for Coding- Be10x Academy
- Advanced IT Skills Training (CyberSecurity) - Redington Foundation
- PowerBI Dashboard Mastery- Be10x Academy
- Prompt Engineering- Be10x Academy
- AI Art Generation- Be10x Academy
- Microsoft Office Mastery- Be10x Academy
- Cybersecurity Essentials Certification- Cisco Networking Academy
- Junior Cybersecurity Analyst- Cisco Networking Academy

PERSONAL DETAILS

Date of Birth: 22/11/2003

Gender: Male

Languages: English, Hindi

Interests: Painting, Travelling, Playing Badminton, Cricket and Football, Solving Logical Questions

Place: Prayagraj, Uttar Pradesh

Date: 20/06/2026

Signature:
